- System design
- Responsive design
- WebGL
- R3F
- Astro
- GLSL
- Gitlab
- Tailwind CSS
- P5.js
- JS animations
- CSS animations
- Barba.js
- Blender
- Framer Motion

SOFT SKILLS

- Assertive communication
- Teamwork
- Problem-solving
- Autonomy
- Productivity
- Empathy
- Organization

LANGUAGES

- English: B2/C1
- Spanish: native

HOBBIES

Sports, Video Games,
Books, Science Movies,
Music, Languages, Dance.

FRONT END DEVELOPER

RESUME

I am a self-taught Front-end developer with a strong focus on creating, modifying, automating, and maintaining captivating, inspiring, and user-friendly web apps. I thrive in a state of unwavering focus when working independently, yet I find immense satisfaction in collaborating with cross-functional teams to tackle ambitious projects. Likewise, I genuinely value the opportunity to exchange feedback, be it with peers, managers, or esteemed clients.

Equipped with a relentless drive to create, I am equally passionate about continuous learning, approaching each day with unwavering humility, reminiscent of the very first line of code I executed.

EXPERIENCE

Inmersys

Web Developer | October 2023 - present

- Build web applications using modern technologies like React, Three.js, Tailwind.
- Improve the user experience in each project with great interfaces and animations
- Resolve problems in various projects that allow us to finish them on time.

PROJECTS

- **Magic Wand:** Here, second place in Three.js journey challenge, a magical space made with Three.js, GLSL, React and Tailwind.
- **Accountant Landing Page:** In this project, I used HTML, JS and Sass for an accountant who need a Landing Page.
- **Mokepon:** I have created a video game where you can choose your Mokepon and battle against other Mokepon, using JavaScript, HTML, and CSS.
- **To-do app:** I made a to-do app using React, Tailwind, and Greensock. It's so customizable, you can add profile information.

... You can find all of these projects in my portfolio.

EDUCATION

My main source of knowledge has been internet, along with documentations, tutorials, books and courses.

- Platzi
- Advance Frontends
- Three.js Journey
- Dev talles
- Awwwards academy
